Electrical Cabinet Cooling – CounterMeasure

Equipment Name: Various

Air blows out of this electrical control cabinet via this muffin fan. We are actually pulling a vacuum on this cabinet. Dirt gets sucked into the cabinet

through any openings or voids. Failures result!! See below!

Flip muffin fan 180 degrees. Air now blows in, putting positive air pressure into the cabinet. It is clean filtered air. When filters get dirty, it is very visible and the Operator can change them. This will keep the cabinet clean & cool.
