Energy Observations

All of the high technology tools in the world, cannot replace your powers of observation. Have you ever seen lights on, in your parking lot at work during the daylight hours? Have you seen a faucet drip? Have you heard air leaks?

The next time you see lights on, report it to your facilities manager. Keep trying until someone takes care of the issue. Do not give up. Small waste adds up to large waste.

Be observant!!

Look for energy waste!! It is everywhere!!
When walking the manufacturing floor, listen for air leaks!!
In an elevator, look at the PM certificate. Is it out of date?
When passing a fire extinguisher, check the PM date!!
Train yourself to be observant....Practice every day!!
