# Position Hand Tools For Ease Of Use And Improved Ergonomics

1) Improper hand tool positioning can lead to worker fatigue and lost productivity.

2) In this example, the operator needs to grasp hammers in the opposite way they are to be used. This creates an uncomfortable condition, especially when the tool has weight.

3) The hammer is used in the position as shown below.

4) Tools should be located and stored in the position that they will be utilized.
