## Incoming Air Pressure – Regulated?

Equipment Name: Various

X	Basic Skill
X	CounterMeasure
X	Accessibility
X	Safety
X	Mistake Proofing
X	Productivity

Main Air Pressure typically comes in at the back of a machine. What is the optimal setting? Does it change from week to week? Does it affect the process? No one knows.

Here, air pressure is controlled at the operators panel. Separate air pressure regulators control other process functions. Gages are marked for optimum running and clustered.
