

# Equipment and Maintenance Evaluation

## On-site Assessment

It's hard to get from point A to point B without a detailed road map. The same applies when you're making the journey from reactive to proactive maintenance. A good assessment of where we are today, and turn by turn instructions to get to our destination will help you get there quickly.

We will improve your competitiveness and profitability by creating a plan that identifies the activities you need complete and the processes you need to implement to achieve maintenance excellence - and the fully engaged team and maintenance function that can get you there. Soon, you will be driving towards sustained uptime, optimized equipment life cycles and performance, and minimized waste and premature equipment failure.

Fuss & O'Neill Manufacturing Solutions, LLC performs our Bronze-Silver-Gold evaluation with key company personnel to determine areas in need of improvement, as well as where, when, and how to start accomplishing the progress you desire.

### About the Instructor

**Larry Bouvier, CMRP**  
Vice President

Fuss & O'Neill Manufacturing Solutions, LLC

Larry has more than 25 years of experience in Engineering and Maintenance Management. A coach and mentor to his employees, peers, and clients, he develops and leads maintenance organizations, establishes maintenance best practices, and improves processes and equipment reliability. Larry is a natural leader, drawing on his organizational and hands-on skills to provide building, shop floor, and classroom training in TPM, RCM, maintenance excellence, maintenance skills, and productivity improvements, which translate to cost savings for his clients.

[www.fando.com](http://www.fando.com)

We develop the necessary steps for future training and other actions as part of a manageable action plan for the client team:

- A. Program Orientation
- B. Facility Introduction
- C. Maintenance Assessment Process Overview
- D. Criteria Establishment
- E. Operations and Maintenance Assessment/ Review
- F. Meet with Personnel
- G. Opportunity Studies
- H. Review/Evaluate Performance Metrics
- I. Summarize Observations
- J. Provide Recommendations and Timeline
- K. Action Items and Implementation Plan

### The Bronze-Silver-Gold Difference

**Bronze** - Basic Foundations for Success

**Silver** - Efficiency and Effectiveness Increase

**Gold** - Performance Optimization and Profitability

## The Fuss & O'Neill Difference

Our team averages more than 25 years of multi-industrial experience (aerospace, automotive, steel, food, pharmaceutical, packaging, consumer goods, etc.), including maintenance and reliability engineering management, consulting, and engineering services. We have delivered sustainable results again and again.

**We won't just tell you what you can do to achieve your objectives – we'll show you how.**

- Industry Experience
- Change Management Experts
- Effective Integration with Ongoing Improvements
- Draw on Employee Expertise
- Minimal Disruption
- Immediate Results

### Process/Methodology

- Our 80-point diagnostic compares your operations against industry best practices.
- We review your performance metrics to identify opportunities for improvement and understand the sources of loss to be minimized.
- We take data of our own during the assessment to validate yours.
- We do our best work on the floor, shadowing and collaborating with your team, “test driving” your processes and physically examining representative equipment to find opportunities and hidden threats.

### Deliverables

- A scored assessment report with recommendations for improvement, including quick wins and long-term strategies and tactics.
- A time-phased, high-level implementation plan that proceeds based on what you can achieve, and that accelerates as you grow and improve.

### Results You Can Expect

- Improved Overall Equipment Effectiveness (OEE)
- Improved Employee Engagement
- Safer, Environmentally-compliant Success
- Longer Equipment Life Cycles
- Reduced Waste
- Improved Profitability
