

Greeting Card Design

Though we don't have an Arts and Crafts Department at Fuss & O'Neill, a lot of our work includes design, whether that be the design of a new park, design of systems to improve wastewater or groundwater flow, or design of ways to improve energy systems. We use many different types of software to create models of our work and we use CAD, which stands for computer-aided design. We'll show you some of these designs in another lesson. Today, we'd like you to design.

**Download a card template from the link.
Design it any way you want, but we recommend:**

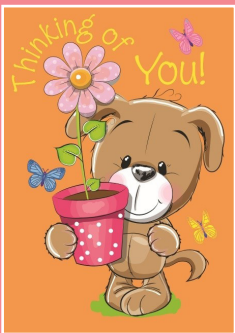

A Greeting Card - Just to Say Hello

Ask your parents if you can mail a card to an assisted living facility in your community. It will brightened the day of someone who can't be with their family right now.

A Thank You Card

Ask your parents if you can mail a card to a local hospital. It's a good time to thank all the nurses, doctors, administrators, technicians, food service providers, custodians, maintenance staff, and all the others that help us when we need it.

A Thinking of You Card

Ask you parents if you can mail a card to your teacher or school. Let them know you look forward to seeing them every day again.
